

A photograph of three people sitting around a dark conference table in a bright room with large windows. A man on the left is partially visible, wearing glasses and a white shirt. A woman in the center is smiling and looking towards the right. A woman on the right is also smiling and holding a green folder. The room has blue curtains and a brick wall visible through the window.

SAFe® PRODUCT OWNER/PRODUCT MANAGER (6.0)

SAFe® Product Owner/PM enhances value creation

In this course, you learn how to act in the role of SAFe® Product Owner and how to write effective Epics, Features and User Stories.

Gain insight into how you can take part in an Agile Release Train (ART), and how to plan and execute iterations and strengthen deliveries with a general plan (PI Planning) and execute a Program Increment (PI).

This course provides you with models and tools that help you succeed in the role of Product Owner (PO) or Product Manager (PM). Learn how to implement SAFe® in an organisation, achieve coherence between the PO and PM roles and create business value as a link between clients and developers.

Participant Profile

Everyone is welcome, as the target audience for the course is very broad.

The course is particularly aimed at product managers, product owners, business owners, business analysts, product line managers, solution managers, portfolio managers, programme managers, employees in a PMO, as well as IT and systems architects.

Preparation, exam and certification

SAFe® exam must be taken within 30 days and includes one attempt; extra attempts can be purchased. You'll get preparation guidance and must pass a test exam first (you can retake it until passed).

The final exam is online, in English, multiple-choice, closed book, accessed via the SAFe® Community Platform.

Both tests have 45 questions in 90 minutes. Pass mark: 35/45 (77%).

MannaZ

Programme structure and content

SAFe® Product Owner/Product Manager is a 2-day classroom-course, with lunch provided at the training venue.

During this course you will work with:

- 🕒 SAFe® Product Owner/Product Manager roles and interaction

The price includes

- 🕒 2 course days
- 🕒 Test exams
- 🕒 Final exam (1 attempt)
- 🕒 All meals
- 🕒 Course materials
- 🕒 SAFe® Product Owner/Product Manager certification

What is Scrum?

In short, agile is a way of working – a mindset – whereas Scrum is a framework that builds on agile principles and values. SAFe® scales that frame and ensures that we can use Scrum on an enterprise level.
