# PRINCE2® AGILE FOUNDATION

PRINCE2 Agile® is the world's most comprehensive collection of agile project management methods. It combines PRINCE2®'s clearly defined framework, which thousands of Danish project managers have enjoyed for years, with the agile world's flexibility and unpretentiousness. This combination is very valuable for project managers, participants, and organisations who wish to challenge and expand their application of PRINCE2® with agile tools.

PRINCE2® is sometimes mistaken as being documentation-heavy. PRINCE2 Agile® puts great emphasis on supporting project participants to avoid bureaucratic work within the PRINCE2®'s framework. As a PRINCE2® Foundation-certified course participant, you will greatly start on your agile toolbox – whether or not your company has chosen to work in an agile way.

You can also save money by purchasing the PRINCE2 Agile® Foundation and PRINCE2 Agile® Practitioner in a combined course package.

## Participant Profile

---

The course is relevant for anyone who wants to work in a more agile way with PRINCE2®. You don't need any prior knowledge of PRINCE2® to take the certification, as the fundamental elements are covered during the training. Agile experience is not required either, as we go through the agile methods and frameworks as part of the course.

The course is relevant for anyone looking to combine PRINCE2® with agile project methods – whether you are a project manager, project support, or part of the wider project team

---

*“Such a great facilitator, who explains everything so well and facilitates relevant cases and exercises.”*
